ENGINEERED FOR THE EVERYDAY

Since the introduction of the first bagless vacuum cleaner in 1993, Dyson devices have solved problems that others have overlooked.

We develop solutions to the problems we face in our daily lives.

We have created a device that removes dust and air pollutants,
and we have created a device that reduces hair damage.

The never-ending drive to improve technology is our driving force.

That's why only Dyson works like Dyson.

www.gatevision.co.kr

DYSON AIRWRAP COMPLETE

This styler creates curls, shapes your hair, and tames flyaways all without excessive heat damage. It dries and styles simultaneously, with powerful airflow and intelligent temperature control to help protect your hair while achieving your desired look. Enhanced with newly engineered styling tools, it utilizes a more effective Coanda effect for improved styling performance. The innovative Dyson Airwrap Complete allows for faster and easier styling, enabling you to create voluminous waves or sleek straight styles using a single barrel for both directions. It gently wraps hair with airflow, delivering versatile results with minimal damage.

DYSON AIRSTRAIT

Dyson's latest hair care technology is the innovative Dyson AirStrait that simultaneously blow-dries and straightens wet hair.

The heated air flows evenly across the hair, completing the styling without excessive heat damage. The intelligent thermal control system is designed to regulate the temperature up to 16 times per second to prevent heat damage to protect your hair's natural shine.

THE WORLD OF NO.1 DRONE BRAND

DJI has established itself as a leading global brand in a variety of fields, including drones, handheld camera systems, and robotics training. With cutting-edge technology, we have redefined the concept of 'Made in China'.

With talent and partners as the core foundation, and innovation as the driving force, we have continued to evolve. We believe that the purpose of life in the now and future is to evolve. That's why we envision a future where different people use DJI technology to make our world a better place. DJI's mission is to be a science and technology company that continues to drive human progress.

DJI's vision is to be a pioneer in the era of spatial intelligence, making the beauty of science and technology beyond imagination.

www.gatevision.co.kr

DJI MAVIC 4 PRO

The triple-camera system delivers exceptional performance across all lenses, capturing everything from expansive wide-angle landscapes to detailed telephoto close-ups with stunning clarity. All three cameras support 10-bit D-Log, D-Log M, and HLG color profiles, ensuring consistent and accurate color reproduction throughout your footage.

The 70mm focal length offers a distinctive sense of perspective that highlights your subject, making it ideal for dynamic portrait shots or cinematic automotive footage featuring orbital camera movements.

DJI OSMO POCKET 4

The all-new Osmo Pocket 4 features a powerful 16mm (1") CMOS sensor, delivering exceptional image quality with enhanced detail and clarity.

Equipped with a rotatable touchscreen and upgraded ActiveTrack, it enables intuitive horizontal and vertical shooting with fast, precise subject tracking. Supporting up to 4K/240fps recording, a 3-axis mechanical stabilization system, and advanced intelligent shooting features, Osmo Pocket 4 empowers users to capture smooth, professional-quality content anytime, anywhere.

H A S S E L B L A D

CAPTURING HISTORY IN SPACE ON THE MOON SINCE 1969

Founded in 1841, Hasselblad is a leading manufacturer of medium format cameras and lenses. Handmade in Sweden, Hasselblad cameras are known for their ergonomic design, image quality, and craftsmanship.

For over half a century, including humanity's first moon landing, Hasselblad has helped shape how we see the world through true photographic art.

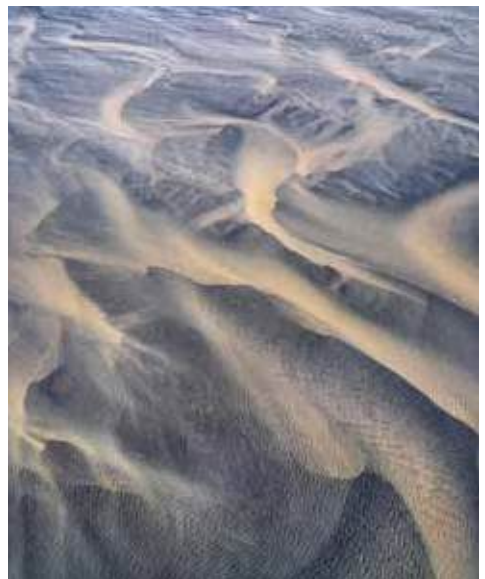

Trusted by NASA and top photographers worldwide,
Hasselblad continues to create inspiring works.

www.gatevision.co.kr

THE WORLD

THROUGH A HASSELBLAD

The background of the advertisement is a photograph of a blue sky with a few wispy clouds. In the middle ground, there is a modern building with a circular top section. In the foreground, a blue asphalt road with white dashed lines curves from the bottom left towards the right. The overall scene is bright and clear.

GARMIN®

ENGINEERED ON THE INSIDE FOR LIFE ON THE OUTSIDE

Founded in 1989, Garmin is a global premium smart device brand built on aviation expertise and industry-leading GPS technology.

Through continuous innovation and engineering excellence, Garmin has expanded its presence across aviation, marine, automotive, outdoor, and fitness markets, serving millions of users worldwide.

By managing every stage of development from design and manufacturing to service, Garmin delivers exceptional quality and reliability, empowering users in their pursuits, adventures, and healthy lifestyles.

Today, Garmin has evolved beyond smartwatches to become a global technology brand that connects people with their passions and potential.

www.gatevision.co.kr

GARMIN FORERUNNER 170

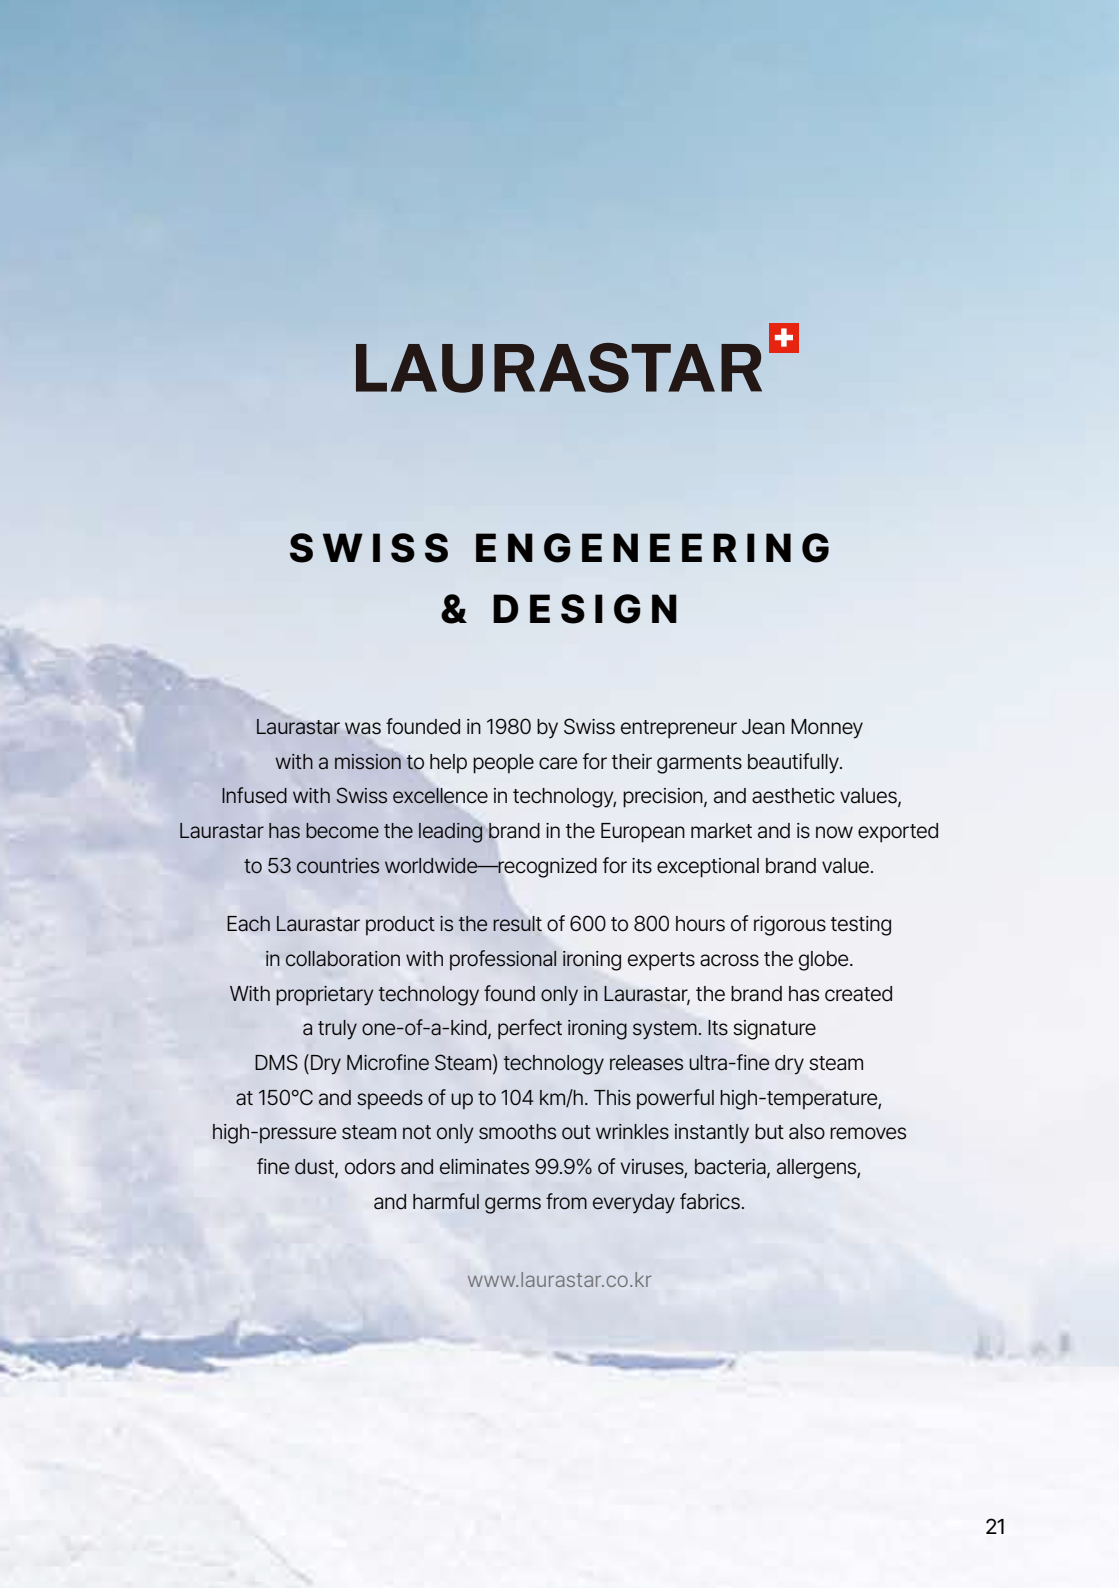

The next-generation running GPS smartwatch combines a vivid AMOLED display with advanced running analytics to deliver a smarter, more effective training experience. Featuring professional training tools such as Training Readiness, Running Power, and Garmin Coach, it helps runners optimize performance while monitoring overall health and recovery. With up to 10 days of battery life, more than 80 sports apps, and a range of smart features, the Forerunner 170 is the ideal companion for runners from everyday training to race day.

GARMIN VENU X1

The Venu X1 is a premium fitness GPS smartwatch featuring an industry-leading AMOLED display and an ultra-slim design. Built with a sapphire lens and titanium materials, it combines refined aesthetics with exceptional durability, while delivering intuitive access to advanced health monitoring and professional training insights. With up to 8 days of battery life, a built-in LED flashlight, calling capabilities, and a wide range of sports and wellness features, the Venu X1 is designed to support both everyday life and high-performance training.

LAURASTAR⁺

SWISS ENGINEERING & DESIGN

Laurastar was founded in 1980 by Swiss entrepreneur Jean Monney with a mission to help people care for their garments beautifully. Infused with Swiss excellence in technology, precision, and aesthetic values, Laurastar has become the leading brand in the European market and is now exported to 53 countries worldwide—recognized for its exceptional brand value.

Each Laurastar product is the result of 600 to 800 hours of rigorous testing in collaboration with professional ironing experts across the globe. With proprietary technology found only in Laurastar, the brand has created a truly one-of-a-kind, perfect ironing system. Its signature DMS (Dry Microfine Steam) technology releases ultra-fine dry steam at 150°C and speeds of up to 104 km/h. This powerful high-temperature, high-pressure steam not only smooths out wrinkles instantly but also removes fine dust, odors and eliminates 99.9% of viruses, bacteria, allergens, and harmful germs from everyday fabrics.

www.laurastar.co.kr

SMART U

The All-in-One Smart U is an integrated system that combines the iron, ironing board, and boiler tank—allowing you to achieve professional-level ironing results right at home. Its Active Board features help cool fabrics quickly and offer both blower and suction modes, making ironing easier and more efficient. With six adjustable height levels, you can iron comfortably at your preferred position. The SensoSteam technology with automatic steam release enhances daily convenience by delivering smart, responsive performance. Through the dedicated Smart app, you can power the system on remotely, monitor usage time, track filter replacement cycles, and manage regular maintenance with ease.

IZZ1

The Laurastar Hygienic Steamer IZZ1 uses DMS (Dry Microfine Steam) technology to help protect your home. With easy mobility, it allows you to steam-sterilize and disinfect various areas of your home, and quickly refresh and deodorize garments before or after going out. From the living room to the kitchen and bathroom, the IZZ1 steamer creates a clean, hygienic environment with the power of steam. Its high-pressure steam, released at approximately 150°C, shortens ironing time while eliminating 99.9% of viruses, bacteria, and harmful germs in your home. Experience Laurastar's IZZ1 Steamer—your daily sterilizing care solution.

The background of the entire page is a dark, textured image of wood paneling, likely from a classic interior. The panels are arranged in a grid-like pattern with vertical and horizontal lines.

litter•robot[®]
by whisker

**LEADING AUTOMATIC
CAT LITTER BOX**

For the past 25 years, Litter-robot has played a leading role in driving pet care technology and shaping future culture. Founder Brad Baxter realized how unsightly and uncomfortable his cat's neglected litter box was, and decided to find a way to solve the hassle of litter box cleaning.

As a result, Litter Robot has ranked first in U.S. market share for the past 25 years and has established itself as a cutting-edge automatic cat toilet brand used by more than 1.8 million people around the world.

www.litter-robot.kr

Litter-Robot 4

Litter-Robot 4 automatically separates waste into a clean drawer after your cat uses the litter box, keeping your space neat and odor-free. The interior of the globe is made from premium-grade silicone, reducing litter impact and preventing dust from forming. Its extra-large 40cm diameter circular globe ensures optimal airflow and provides ample space—making it comfortable for kittens and adult cats alike. The elegant color options and sleek design blend seamlessly with any interior, creating a premium atmosphere that satisfies both cats and their owners.

LitterHopper®

The Litter-Hopper, an automatic litter refill solution, maintains the optimal litter level at all times. With every cycle, OmniSense® Detection technology measures the litter depth, and when it detects that the level has dropped below the ideal threshold, it automatically refills the litter during the next cleaning cycle.

Ramp

The Litter-Robot 4 Ramp is designed for kittens and senior cats to enter and exit smoothly. It assembles easily without tools, enhancing your cat's Litter-Robot experience.

A sleek, modern, metallic Aarke sparkling water maker is partially visible on the left side of the frame, resting on a dark, textured surface. The device has a cylindrical body and a handle.

aarke

SWEDEN ICONIC SPARKLING WATER MAKER

Aarke means 'everyday' in the northern Swedish language.

As its name suggests, Aarke makes customers' everyday life more special.

Our core value is to present sustainably made products.

Founded in 2013, Aarke is a Swedish company
started by industrial designers Carl Ljungh and Jonas Groth.

Aarke stands out for its modern yet classic Northern European design.

It is exported to 35 countries, with 1.2 million units sold.

Aarke is now an iconic carbonated water maker loved in Europe.

www.aarke.co.kr

Carbonator 3

The Carbonator 3 is a premium sparkling water maker that embodies modern yet timeless Swedish design. Crafted entirely from stainless steel, it offers exceptional durability along with consistent engineering and aesthetics.

Equipped with a triple-valve system and a precision-engineered nozzle, it delivers fine, uniform carbonation for a refined and balanced sparkling experience.

Carbonator Pro

The Carbonator Pro is a carbonated water maker with a modern, rough-textured design, incorporating a dishwasher-safe glass bottle, one-handed operation, and a smooth Push to Lock function.

RESPONSIBLE FOR YOUR SAFE SLEEP

IMETEC, a world-renowned premium Italian brand, was founded in 1973 with a mission to provide customers with the utmost comfort in sleep.

For over 50 years, the brand has built a strong reputation through its premium home appliances. As a market leader in Italy, IMETEC stays true to its unique identity while continuously adapting to diverse consumer needs. Its IntelliHeat technology and Electro Block safety system ensure both restful sleep and reliable safety for users. Now available in over 30 countries worldwide, IMETEC products can also be found at major department stores and through Gatevision in Korea.

www.imeteckorea.co.kr

PREMIUM IMETEC

IMETEC's proprietary IntelliHeat automatic temperature control technology uses sensors embedded within the heating element to monitor indoor temperature changes in real-time. It adjusts the power supply accordingly to maintain the set temperature, preventing low-temperature burns while ensuring optimal warmth.

The system has been safety-certified through electromagnetic field testing in three countries. Additionally, its patented dual-pole design suppresses static electricity by generating opposing magnetic fields. IMETEC products have also passed the globally recognized Oeko-Tex certification and radon tests conducted by the nationally accredited testing institute, KOTITI Testing & Research Institute, making them safe and reliable for users of all ages.

Overblanket

Blanket featuring a soft texture and luxury design, the overblanket is easy to fold and easy to move and store, making it easy for camping or staying overnight. After removing the controller, it is machine washable, so you can always keep it as hygienic as possible.

Heating Pad

With a variety of heating pad options, you can choose the one that best fits the area you need to treat. The automatic temperature control ensures consistent, optimal heat to soothe tense muscles effectively. Thanks to its ultra-thin heating wire, the pad provides comfortable therapy for extended periods without any discomfort or irritation.

HEALTHIER HOMES SINCE 1950

Since 1950, Sweden's No.1 brand Wood's, has been manufacturing dehumidifiers, air purifiers, and clothes care devices with Woods' unique source technology for about 70 years. We manufactured the world's first dehumidifier to prevent damage caused by mold and moisture, and have sold more than 1.7 million products in Europe over the past 10 years with the goal of developing environmentally friendly products, and manufacture and distribute various air quality-related products.

Exported to more than 30 countries around the world, all of Woods' products are fully designed in Sweden with the highest quality and safety, low energy consumption, and large capacity, and are the world leader in high-quality air care solutions.

www.woods.co.kr

SW22FW / SW42FX / SW42FW / SW30FW

Wood's smart I-ECO Defrost system, dehumidification is possible under all temperature and humidity conditions. Offering a high daily dehumidification capacity and coverage for large spaces, it is suitable for both residential and industrial use. Its front downward airflow design helps manage moisture in warm air that settles near the floor, reducing the impact and discomfort caused by hot, dry air on the human body.

WCD4PRO

It is possible to take care a large space of about 70 square meters with a wide range of temperature and humidity conditions. It is a dehumidifier that can be stacked with 3 units together for easy movement and storage, and it can be easily dismantled and cleaned using a semi-permanent FOAM filter.

BEYOND THE ERA OF AIR PURIFICATION, THE ERA OF AIR STERILIZATION

Ireland's Novaerus, a life science powerhouse, is a state-of-the-art air sterilizer created through continuous research and development since 2009.

Its performance has been recognized by over 30 world-class research institutes, including NASA in the US, and it is exported to over 50 countries around the world (USA, Spain, Czech Republic, Greece, etc.).

This product, which has an outstanding sterilizing ability has been approved as a medical device by the European CE and the US FDA, is currently used in over 1,400 domestic ambulances, over 650 medical institutions, schools, daycare centers, public facilities, indoor exercise facilities, senior living facilities, and postpartum care centers. It is being used in about 250 multi-use facilities including churches, restaurants, and cafes.

NanoStrike, Novaerus' unique world-patented technology, applies 4KV high voltage to the plasma coil to form a plasma field, destroying and sterilizing viruses, bacteria, pathogens, allergens, molds, and other harmful substances in the air passing through it in 0.002 seconds.

www.novaerus.co.kr

PROTECT NV990

NV990, which can be used in a large space of about 32 square meters, destroys and sterilizes various viruses, bacteria and harmful substances through nano-strike technology.

It can be used with a stand or wall-mount and can be used to fit your space.

*Stand sold separately

Nanostrike Technology

Fan Control

For Large Space

PROTECT NV330

NV330, which can be used in a small space of about 10 square meters, destroys and sterilizes various viruses, bacteria and harmful substances through nanostrike technology. It can be used with a stand or wall mount on a flat space.

Nanostrike Technology

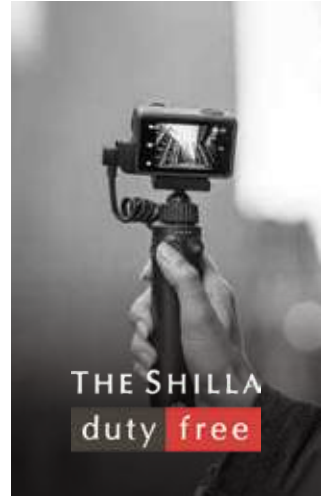

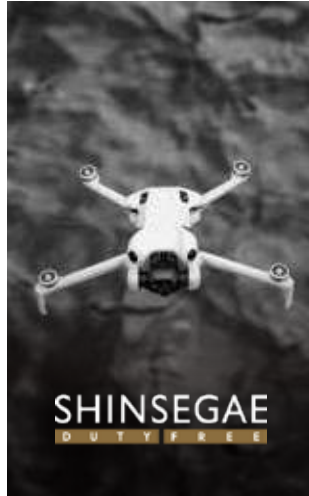

For Compact space
